

# HIGHLIGHTS of the CONSULTATION RESULTS

*One of the strongest messages from the community during the consultation was that they wanted to ensure Frog Hollow Park was protected.*

## **What was the feedback?**

We need to protect Frog Hollow Park and the old Darwin Primary School and to provide pedestrian and cyclist connectivity between these two sites.

## **What is the result?**

The proposed new road will be located between the Frog Hollow Park on the north-western side, and the Frog Hollow Centre for the Arts on the south-eastern side of the Boulevard.

While the corridor for the Boulevard will travel between these two important historical sites, the design has been devised to preserve the heritage values of this space as a key priority. Areas of historical significance have been identified as part of planning works and will be preserved.

The project may also result in improved community access to Frog Hollow Park with a dedicated pedestrian and cyclist paths and a landscaped strip running alongside the Park from Woods to McMinn Streets.
