

# HIGHLIGHTS of the CONSULTATION RESULTS

*The community told us they were concerned about construction impacts on affected businesses. The community also wanted to see heritage and cultural sites protected.*

## **What was the feedback?**

That construction activities may impact 2017 Darwin Festival events at Frog Hollow Centre for the Arts.

## **What is the result?**

We have built flexibility into the construction timeline to reduce impact on directly affected businesses. Construction will not impact the 2017 Darwin Festival events at Frog Hollow. The traffic engineering solutions adopted at Frog Hollow Park ensure that the cultural value of the site is maintained and that works do not encroach on the heritage boundaries of the site. This includes adopting a cul-de-sac at Woods St north, with inclusion of pedestrian and cyclist access to Barneson Boulevard.

The proposed works will require relocation of the Frog Hollow Centre for the Arts toilet block, external stairwell and carpark access from McMinn Street. The infrastructure will be relocated within the same Lot.
