Safety Barrier Technical Conditions for Use

Type F Concrete Safety Barrier - Permanent

Issue Date: 25 June 2019
Supplier: Public Domain

These conditions take precedence over any instructions in the Product Manual. This document is a summary of the Austroads Safety Barrier Assessment Panel’s assessment of the technical performance of the product against AS/NZS 3845 Parts 1 or 2 only. It does not consider procurement practices by individual Road Agencies.

The Austroads Safety Assessment Panel may at any time, withdraw or modify this Technical Conditions for Use without notice.

These acceptance conditions should be read in conjunction with the Product Manual and Austroads Guide to Road Design Part 6: Roadside Design, Safety and Barriers.

Acceptance of this product does not place any obligation on the Northern Territory Government or its contractors, to purchase or use the product.

Status
Accepted – may be used on the classified road network

Product accepted
Profile = Type F – set in a continuous keyed foundation, dowelled or placed in front of compacted backfill in accordance with the Standard (Road) Drawings

Variants
• Single sided
• Double sided

Options
• Cast in-situ
• Slip formed

Variants that are NOT listed above are NOT recommended for acceptance.

Accepted speed 70 km/h (TL2), 50 km/h (TL1)
Product manual reviewed Release 03/19 (Australia/New Zealand)

Approved Connections

Crash Cushions or Terminals must be fitted to both ends of a barrier

Public Domain Products
W-Beam Guardrail Not Permitted
Thrrie-Beam Guardrail Permitted

Proprietary Products
• Refer to end treatment acceptance conditions for accepted connections.
Design Guidance

This product must be installed and maintained in accordance with the Product Manual and Road Agency specifications. Road Agency specifications and standards shall have precedence.

| Minimum installation length | TL3 – 30 metres between crash cushions/terminals (tested article)  
|                           | TL4 – 45 metres between crash cushions/terminals (tested article)  
|                           | TL5 – 100 metres between crash cushions/terminals (tested article) |
| System width (m)          | 0.6 metres  
| Minimum distance to excavation | 0.5 metres  
| Slope limit               | Side slope limit: 10 Horizontal to 1 Vertical (10%).  
| Systems conditions        | 1. Flaring across the clear zone without an approved connection and terminal is NOT permitted.  
|                           | 2. The maximum upstand is 80mm.  
| Gore area use             | Permitted  
| Pedestrian area use       | Permitted – consider potential for snagging and deflection  
| Cycleway use              | Permitted – consider potential for snagging and deflection  
| Frequent impact likely    | Permitted  
| Remote location           | Permitted  
| Median use                | Permitted
