

Mandorah Jetty Maintenance Works

Dear stakeholder,

Access to the Mandorah Jetty Head Deck is restricted to the public to allow works to maintain the structure integrity of the Jetty.

The Jetty requires the replacement of deck sections on the lower deck and the installation of new steel handrails to the jetty to maintain safety.

The \$50 million New Marine Facility at Mandorah is still being progressed and these works are interim maintenance requirements.

The Department of Infrastructure, Planning and Logistics has engaged an engineering contractor with specific experience to undertake the required work to ensure the structural integrity of the jetty is maintained.

Fishing is permitted from the Jetty Approach Deck during the scheduled works. No fishing will be permitted from the Jetty Head Deck. Public access to the stairs to the lower decks will be restricted to ensure public safety during the works. See attached map.

SeaLink's ferry service will run as scheduled for the duration of the works.

Public access will still be available to the shelter on the Jetty Head Deck during the works and access to and from the ferry service will be controlled by the contractor in collaboration with SeaLink.

Current agreed vehicular access will remain available to key stakeholders during the works.

Works are scheduled to commence on 6 January 2020 and completed in March 2020.
