**These conditions take precedence over any instructions in the Product Manual.**

This document is a summary of the Austroads Safety Barrier Assessment Panel’s assessment of the technical performance of the product against AS/NZS 3845 Parts 1 or 2 only. It does not consider procurement practices by individual Road Agencies.

The Austroads Safety Assessment Panel may at any time, withdraw or modify this Technical Conditions for Use without notice.

These acceptance conditions should be read in conjunction with the Product Manual and Austroads Guide to Road Design Part 6: Roadside Design, Safety and Barriers.

Acceptance of this product does not place any obligation on the Northern Territory Government or its contractors, to purchase or use the product.

### Status

**Legacy** – Existing installations can remain in service until the end of service life. No new installations permitted.

These acceptance conditions take precedence over any instructions in the Product Manual.

### Product accepted

- SENTRYLINE II 4 Wire Rope Barrier System - Permanent consisting of 4 wire ropes supported in notches in flat sided, hollow, oval section posts with one rope either side of the post and 2 ropes in the central slot. Posts set into a plastic sleeve in a concrete footing. Rope tension is 25 kN.
- Colour of posts to be determined by local Road Agency.

### Variants

- Nil.

### Product Manual reviewed

Dated December 2017

### Variants NOT accepted

- End fittings using mechanical swaging.
- Wire rope cables held to a trigger strut that is NOT bolted to the ground strut.
- Variants that are not on the list above are not accepted.
- Variants accepted in other jurisdictions, but not accepted in the local jurisdiction, are NOT permitted.

### Product manual

### Speed limit (km/h)

Tested at 100 km/h. May be used in 110 km/h speed zones (permanent installation only).

### Tested containment

NCHRP 350 Test Level 4 (8,000 kg at 80 km/h and 15°).

### Tested dynamic deflection

<table>
<thead>
<tr>
<th>100 km/h</th>
<th>1.6 metres.</th>
</tr>
</thead>
</table>

Note that deflections are measured in crash tests performed under controlled conditions. Designers should be aware that the deflection figures published as a test result may not be the deflection values achieved in the field for all impacts by errant vehicles dependent upon foundation conditions and roadside geometry.

### Point of need

At leading end – 8 metres downstream from the end of terminal.
### Development length
Not applicable.

### Minimum length of barrier between terminals
114 metres.

### System width (m)
- 0.3 metres at post
- 0.4 metres at terminal

### System conditions
1. Anchor spacing greater than 1,000 metres is NOT permitted.
2. Installation on top of a kerb is not recommended, however if installed on top of a kerb, all system components must be free to operate.

|                           | Proprietary product | 1. SENTRYLINE TERMINAL END III WIRE ROPE TERMINAL SYSTEM - PERMANENT  
|                           |                  |   - Permitted for use with SENTRYLINE II 4 Wire Rope Barrier System - Permanent.  
|                           |                  |   - Permitted as a terminal on a flare.  
|                           |                  |   - This is a gating terminal. |
|                           | Other            | A terminal must be fitted to both ends of the barrier. |

### Gore area use
Permitted.

### Pedestrian area use
Permitted. – consider potential for snagging and deflection.

### Cycleway use
Permitted. – consider potential for snagging and deflection.

### Frequent impact likely
Not permitted.

### Remote location
Not permitted.

### Median use
Permitted.

### Flare (See Explanation of Terms diagram)
Refer to Austroads Guide to Road Design Part 6: Roadside Design, Safety and Barriers Table 6.5 for design advice.

### Offset to travel lane (m)
Refer to Austroads Guide to Road Design Part 6: Roadside Design, Safety and Barriers, Section 6.3.5.

### Hazard free area beside barrier or terminal (Working Width)
Refer to Austroads Guide to Road Design Part 6: Roadside Design, Safety and Barriers, Section 6.3.16.

### Gore area use
Permitted.

### Installation
The SENTRYLINE II 4 Wire Rope Barrier System - Permanent must be installed and maintained in accordance with the Product Manual and Road Agency specifications. The Road Agency specifications and standards shall have precedence.

### Minimum distance to excavation
1.6 metres minimum distance between the edge of the barrier and the edge of an excavation. (Being the largest adopted dynamic deflection).

### Slope limit
Side slope limit: 10 Horizontal to 1 Vertical (10%).

### Foundation pavement conditions
- Concrete: Permitted with coring holes.
- Deep lift Asphaltic Concrete: Permitted with coring holes.
- Asphaltic concrete over granular pavement: Permitted.
- Flush seal over granular pavement: Permitted.
- Unsealed compacted formation: Permitted.
- Natural surface: Permitted.

Foundation pavement conditions must be smooth and free of snag points, kerbs or obstructions that may interfere with the operation of the product.
| **Attachments and screens** | In accordance with the requirements of Australian/New Zealand Standard AS/NZS 3845, road furniture such as headlight screens, signs, lighting posts and fences for pedestrians, visual screens, debris screens, platforms for workers and other non-product hardware must not be attached to the product. Screens may be placed adjacent to the side of the product not exposed to traffic. The distance between the screen and the product shall be determined by a site specific risk assessment that considers the deflection distance. Screens must not have horizontal members that present a risk of impaling errant vehicles that impact the product. |
| **Damaged components** | Damaged components must be replaced. Repaired components must not be used. |
| **Delineation** | The installed system shall include delineation as prescribed by Road Agency specifications and drawings. |

| **Traceability and markings** | Product markings shall be in accordance with marking/s prescribed by the current Australian/New Zealand Standard AS/NZS 3845 Road Safety Barrier Systems and Road Agency specifications. Traceability details that must be permanently fixed to the product are: |
| | • Name of the product. |
| | • Manufacturer or distributor name. |
| | • Date of manufacture. |
| | • Model or version details of the product, if applicable. |
| | • Batch number, if applicable. |
| | • Serial number, if applicable. |
| | Traceability details must be easily visible but unobtrusive and not be in a form that becomes prominent advertising. No advertising shall be displayed on the installation. Traceability must be in a form that will not be erased with use. |

| **Notes** | Conditions are based on drawings in the Product Manual supplied by the Proponent, dated December 2013 and August 2015. This acceptance will cease if there is any change in the product design or specifications. |
| | Only the Product Manual authorised by the Proponent shall be used in any marketing of the product. |
| | Acceptance of the SENTRYLINE II 4 Wire Rope Barrier System - Permanent does not place any obligation on the Road Agency, or its contractors, to purchase or use the product. |
| | The Austroads Safety Barrier Assessment Panel may periodically re-assess the SENTRYLINE II 4 Wire Rope Barrier System - Permanent. The Road Agency may withdraw or modify at any time, the acceptance status or conditions of use of the product without notice. Users should refer to the Road Agency web site to ensure they have the latest version of the conditions related to this product. |
