ROCKY BOTTOM CREEK - CENTRAL ARNHEM ROAD CROSSING UPGRADE

Jointly funded through the Australian Government's Regional Roads Productivity Package and the Northern Territory Government, construction works have started at Rocky Bottom Creek Crossing on Central Arnhem Road.

Construction includes a single lane bridge upstream from the existing crossing and 3km of road realignment. These works will reduce the time of annual road closures during weather events and improve access and safety for road users at this crossing.

Access to the existing crossing will be maintained throughout the project. Motorists are urged to travel with care in the area and adhere to all traffic management in place. Completion is expected July 2016.

For more information, please contact Department of Infrastructure's Project Officer Bridges, Cielo Alvaran on 8999 4673 or by email Cielo.Alvaran@nt.gov.au
