

Long-term traffic solution for Coolalinga

Project update

Northern Territory Government has finalised the design for long-term traffic management at Coolalinga.

The design includes changes to the Stuart Highway at Coolalinga and was informed by several rounds of community consultation, as well as technical investigations.

This is a long term solution, which addresses road safety, improves accessibility and allows for future growth in the area.

Key features:

- Two new signalised intersections on the Stuart Highway providing direct access to and from the shopping precincts and future developments.
- Extension of service roads on both sides of the Stuart Highway.
- Extension of existing road behind Coolalinga Central to the new signalised intersection.
- Extension of Henning Road through to Virginia Road.
- New road link between the Stuart Highway and Henning Road.
- Reduced posted speed limit to 60 km/h on the Stuart Highway through this precinct.
